NNN's Acquisition Approach is Unique Because It Is More Difficult

Acquisition quality over quantity requires selectivity, discipline and patience:

- ◆ Small transactions in areas of historical expertise (retail) rather than large portfolio transactions provides higher risk-adjusted returns
- ◆ Retail – NNN's historic expertise generates higher and more consistent operating results vs. other net lease and non-net lease sectors
- ◆ Approximately 25 relationships with management teams of strong growing retail concepts
- ◆ Underwriting focuses on alternative uses upon future rollover and current tenant strength
 - ◆ Multiple credit upgrades after NNN's acquisition – resulting in 17.5% of tenants now investment grade rated
- ◆ Lease terms and conditions negotiated based on unique aspects of location and tenant's business and credit. Tenant "self selection" – unlikely to sign a long-term lease on questionable store

NNN's Unique Acquisition Approach Generates Strong FFO Growth

- ◆ Less buyer competition:
 - ◆ Retail net lease market is very large, but with smaller properties
 - ◆ NNN's more focused relationship-based acquisition approach is more difficult and time consuming
 - ◆ Results in higher initial cap rates and built-in rent growth (see next slide)
- ◆ Careful targeting and underwriting of management and the future prospects of NNN's retail tenants are supported by:
 - ◆ Consistently high portfolio occupancy; and
 - ◆ Multiple credit upgrades realized by relationship tenants
- ◆ Consistently high portfolio occupancy results in less earnings volatility
- ◆ All of the above generate greater per share accretion from lower acquisition volumes and allows NNN to continue to acquire accretively, despite cap rate compression and increased interest rates

NNN Acquisitions Approach has Multiple Advantages

- ◆ Acquiring properties directly from tenants produces more efficient pricing and higher initial returns
- ◆ NNN assess discrete risks vs.
 - ◆ More risks/unknowns in value-add, development, or
 - ◆ Typical lower yielding real estate investment
- ◆ Each deal is structured based on its unique characteristics:
 - ◆ Real estate attributes
 - ◆ Tenant corporate credit analysis
 - ◆ Asset (store) level data

NNN Approach to Net Lease Acquisitions

Due Diligence and Determination of Proceeds & Terms

- ◆ The chart to the right summarizes our areas of focus, which: a) determine our interest in a transaction, and b) drive our specific negotiation of the terms, rates, and proceeds of each deal
- ◆ This sale-leaseback approach to acquisitions produces multiple advantages for NNN versus many of our REIT peers, and particularly our shopping center / mall REIT competitors
- ◆ Our ability to assess these discrete risks in a single-tenant, sale-leaseback transaction has allowed us to execute transactions with very efficient pricing, higher initial returns and more stable cash flows versus the higher and greater unknowns associated with: a) value-add investing, b) new construction / development transactions, and / or, c) lower-yielding, core retail investment strategies

NNN's Disposition Approach

NNN's proven disposition strategy strengthens portfolio quality and long-term earnings by reinvesting at higher return rates

- ◆ Since 2005, sold 817 properties generating net proceeds over \$2.2 billion
