*REIT industry Average as of Q2 2025

NNN's Acquisition Approach is Unique Because It Is More Difficult

Acquisition quality over quantity requires selectivity, discipline and patience:

- ◆ Small transactions in areas of historical expertise (STNL) rather than large portfolio transactions provides higher risk-adjusted returns
- ◆ NNN's historic expertise, generates higher and more consistent operating results vs. other net lease and non-net lease sectors
- ◆ Approximately 25 relationships with management teams of strong, growing concepts
- ◆ Underwriting focuses on alternative uses upon future rollover and current tenant strength
 - ◆ Multiple credit upgrades after NNN's acquisition – resulting in 13.6% of tenants now investment grade rated
- ◆ Lease terms and conditions negotiated based on unique aspects of location and tenant's business and credit. Tenant “self selection” – unlikely to sign a long-term lease on questionable store

NNN's Unique Acquisition Approach Generates Strong FFO Growth

- ◆ Less buyer competition:
 - ◆ STNL market is very large, but with smaller properties
 - ◆ NNN's focused relationship-based acquisition approach is more difficult and time consuming
 - ◆ Results in higher initial cap rates and built-in rent growth (see next slide)
- ◆ Careful targeting and underwriting of tenants and their future prospects are supported by:
 - ◆ 20-year occupancy average over 98%; and
 - ◆ Multiple credit upgrades realized by relationship tenants
- ◆ Consistently high occupancy results in less earnings volatility
- ◆ All of the above generate greater per share accretion from lower acquisition volumes and allows NNN to continue to acquire accretively, despite cap rate compression and increased interest rates
